Key activities for Stage 1 tower

- Ground slab for main tower scheduled to be finished by the end of the year.
- Meetings have begun to discuss logistics and access to the 14-storey tower once it is completed (noting that Stage 2 construction will be underway at this time).
- Works are underway to bring a High Voltage (HV) power feed from nearby Kingswood substation to the Nepean campus to support the new tower.

Did you know?
Access to the new tower will be through linkways from the existing hospital.

New childcare centre

- Works have begun to install reinforcement to the retaining wall along the private hospital side of the new childcare centre.
- Electrical inground service works are ongoing and excavated materials continue to be removed offsite.
- Structural steel posts have also been installed for the concrete wall along Great Western Highway boundary.

Did you know?
The layout of up to 90% of rooms in the new hospital have been decided upon by the relevant departments.

THANK YOU FOR YOUR PATIENCE AND COOPERATION DURING CONSTRUCTION
