

Designs unveiled for Stage 1

On Friday 16 November, Member for Penrith, Stuart Ayres and Member for Mulgoa Tanya Davies visited the Nepean campus to unveil the schematic designs for the new 14-storey clinical tower, which is part of the \$576 million Stage 1 Nepean Redevelopment.

A 3D fly-over of the building and several artist's impressions of the interiors showcase the outcomes of an extensive planning and consultation process with hospital staff and the community.

The Stage 1 hospital tower will include a new and expanded Emergency Department, more than 12 new Operating Theatres, 18 Birthing

Artist's impression of the new Emergency Department entry.

Suites, a new Neonatal Intensive Care Unit, more than 200 overnight beds and a new roof top helipad.

Construction is expected to start in early-2019 following a final detailed design planning and consultation process. This will determine where all the furniture, fittings and equipment will be located in each clinical area and public space of the tower.

Currently, the project team is also conducting a roadshow to capture community input into the look and feel of the public spaces of the new tower. This will feed into the final detailed design phase. Further details about this roadshow are included on page 4 of this newsletter.

New parking changes at Nepean Redevelopment

There will be changes to parking over the Christmas and New Year period to prepare for construction of the Stage 1 hospital tower in early 2019.

From Monday 10 December 2018, we will trial valet parking at the Derby Street multi-storey car park.

This will require drivers to leave their keys with parking attendants when the car park is close to capacity, allowing parking attendants to park the cars in a more efficient way and increase capacity within the multi-storey car park.

Drivers will still be able to retrieve their cars from this car park at any time.

In mid-January 2019, the Somerset Street car park will be permanently closed to allow for construction to commence on the Stage 1 tower.

Additional, temporary staff parking will be provided close to the hospital campus to minimise any disruption to patients and visitors.

All disabled car spaces within the Somerset car park, will be relocated to convenient areas on the hospital campus to ensure spaces are maintained. Details on the new accessible parking locations will be provided in the coming weeks.

Thank you for your support and patience as we progress this important project.

For further information or questions regarding the car parking changes please email:

Did you know?

The new Barber Avenue multi-storey car park will open in mid-2019, providing more than 600 car spaces. It will also have an interim roof-top helipad for emergency helicopter landings.

Nepean Cancer Care Centre Clinic rooms set to open in the New Year

The countdown is on for the completion of the new clinic rooms at the Nepean Cancer Care Centre. Large trucks recently delivered the modular sections of the unit (pictured on the right), and staff are preparing to open the doors to the new rooms in mid-January following a short commissioning period.

Once the new clinic rooms are open, work can start on the expansion of the chemotherapy treatment spaces in parallel with the construction of the third radiation therapy bunker.

All works are scheduled to be complete in mid-2019, which is a great outcome for patients and staff.

Modular building being lifted into place by a crane on the Nepean Cancer Care Centre work site.
